

FireSmart[®] your property

If you wait, you may be too late

Priority Zone 1 HOME / 10 metres

This should be a fire-resistant zone, free of all materials that could easily ignite from a wildfire.

REGULAR MAINTENANCE: Regularly clean your roof, gutters, etc. of debris.

FIRESMART RENOVATIONS: As your budget allows, renovate your home with fire-resistant materials, mesh debris screens, a chimney spark arrestor, etc.

FIRESMART LANDSCAPING: Keep woodpiles, propane tanks, outbuildings and combustibles at least 10 metres away from your home. Consult the *FireSmart[®] Guide to Landscaping* for more tips.

YARD MAINTENANCE: Regularly mow your lawn. Remove deadfall, coniferous trees and other flammable vegetation. Sweep your decks and rake up tree needles, leaves and debris.

Priority Zone 2 10 - 30 metres

Reduce fuels in this area by thinning and pruning vegetation and trees. This will slow a fire's spread.

TREE SPACING: Space trees at least three metres apart.

PRUNING TREES: Prune all branches within two metres of the ground.

REMOVE SURFACE FUELS: Regularly clean up accumulations of fallen branches, dry grass, needles and other flammable debris from the ground.

PLANTING NEW TREES: If you're going to plant new trees in this zone, consider planting deciduous species like aspen, poplar and birch. They have lower flammability rates.

Priority Zone 3 30 - 100 metres

Try to thin out trees and other vegetation. This will help reduce a wildfire's intensity and slow its spread.

THIN AND REMOVE CONIFEROUS TREES: Space dominant trees at least three metres apart, and remove any understory trees that are in close proximity that could act as a ladder for fire to move into the tree tops and spread. Retain deciduous trees which are resistant to wildfire.
